

Electronic Notebook

Liquor Control Enforcement Software System

DESIGNED SPECIFICALLY FOR THE UNIQUE NEEDS OF LIQUOR ENFORCEMENT AGENCIES.

Does your enforcement agency have

- Time-consuming paper-based processes?
- Officers without data access in the field?
- Wasted time driving to/from offices?
- Management reporting problems?
- Inaccurate/outdated data?

In this economy, your agency needs to do more with less. Electronic Notebook can significantly increase officer efficiency & effectiveness, decreasing overall costs.

Electronic Notebook enables officers to instantly see the licensee's complete enforcement and education history in the field. The officer has everything needed to determine the appropriate enforcement or education action.

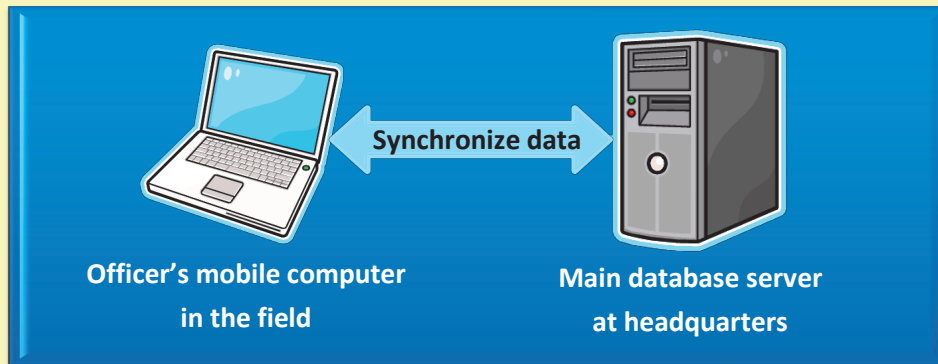

Printing citations on premises allows officers to take immediate enforcement action.

Safety alerts warn your officers about dangerous circumstances.

- Improve officer efficiency
- Significantly reduce travel
- Improve customer service
- Better communication with HQ
- Standardize forms & processes
- Improve officer safety
- Improve licensee education
- Collect better data
- Better reporting
- Robust database = secure data

Replace your officers' paper notebooks with an integrated mobile computer system.

Intuitive Operation

Enforcement Officers

- Automatically sync with HQ database
- Easy access to all data in the field
- Access to enforcement history
- On-site citation printing
- Electronic scheduling & timesheets
- Licensee location directory
- Field action wizard
- Civil infractions & criminal citations
- Integrated security & administration

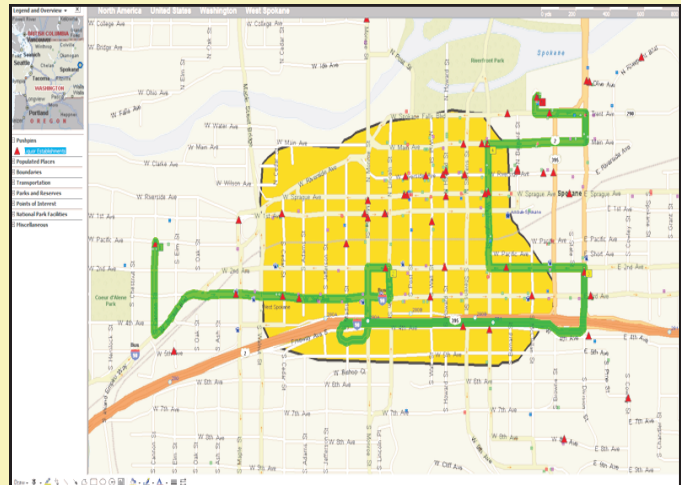

Supervisors

- See officer time entries, schedule & activities
- Monitor managed officers & sync status
- Manage case dispositions
- Extensive management reporting

Mapping

Integrated desktop mapping allows officers to easily locate establishments, generate driving directions or create lists and reports based on geographic regions they define.

Administrators

- Centrally administer user security from HQ office
- Configure pick-list values & application settings
- Manage data conflicts
- Deploy software updates
